

## Norwich Union Healthcare

Site Location: Eastleigh, Southampton  
Contract Value: £1,200,000

This scheme involved moving several departments out of a state of the art office environment into a much more cost effective warehouse building. The brief included developing a working environment without natural light that the staff of this leading company would be more than happy to work in, whilst not sacrificing the corporate image.

Working in close partnership with the client over many months developing the scheme including 2D and 3D presentations, an award winning design was achieved. Standard products were pushed to their extremes to create stunning features; faceted storage wall and glass modules to give the illusion of curves, revolutionary recycled carpets from the States with cut outs that mimic the furniture, and bespoke whiteboards with colour back lighting to add drama to the offices to name a small few. The complex installation was completed on time and within the agreed budgets.
